

Blood Types

1. Create two arrays, one that is a String, one that is an int. Initialize them to have the below values.
2. Print out the following 9 charts using your arrays.
3. Make sure that you add the titles and the chart numbers (use a `System.out.println`)

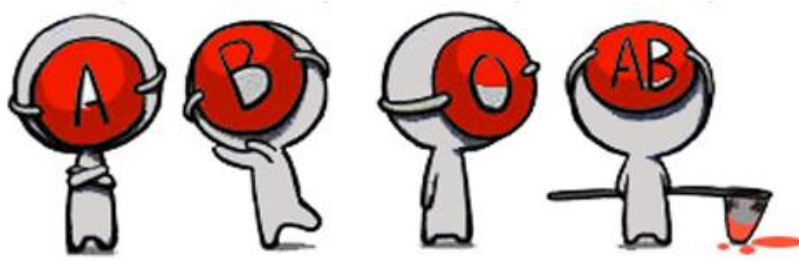

Chart 1
46 40 10 4

Chart 2
Blood Types
O
A
B
AB

Chart 3
The blood types are O, A, B, AB,

Chart 4
The percentages are 46%, 40%, 10%, 4%,

Chart 5
1. O has 46%
