Names

The user enters their first, middle and last name with spaces separating them.
Any name could be entered.
Every name will have a first, middle and last name.

Then, you will print out:
    (a) Their first name
    (b) Their last name
    (c) Their middle name
    (d) Their initials
    (e) Their username (first initial, middle initial, last name).

For example:

```
Name? Ned Everett Body
First: Ned
Last: Body
Middle: Everett
Initials: NED
Username: nebody
```
