

## Error Messages in Option Panes (Dialog Boxes)

1. Add this line of code to the top of your program:

```
import javax.swing.*;
```

```
*RPG.java IO.java
//Name: Gorski
//Date: October 2018
//Purpose: Demo OptionPanes
import javax.swing.*;
public class RPG
{
    public static void main(String args[])
    {
        new RPG ();
    }
}
```

\* If it is already there, don't add it again. Once is fine.

2. Add in this line of code wherever you want the dialog box to appear:

```
JOptionPane.showMessageDialog (null, "alert message", "title", JOptionPane.ERROR_MESSAGE);
```

```
public RPG ()
{
    JOptionPane.showMessageDialog (null, "alert message", "title", JOptionPane.
introduction ());
}
```

3. More information and examples can be found at this link:
